

RS FINANCE GUIDE TO **ALPHA GENERATION**

What is Alpha Generation?

Alpha Generation is a powerful set of **MetaTrader indicators** created by **Trading Central** to enhance your trading experience. These indicators leverage market psychology, technical analysis, and innovative pattern recognition to identify new trade opportunities and potential entry/exit points.

ANALYST VIEWS

This indicator is your go-to source for direction and key levels. Trading Central gives you a directional perspective on every chart based on top-notch technical analysis methodology.

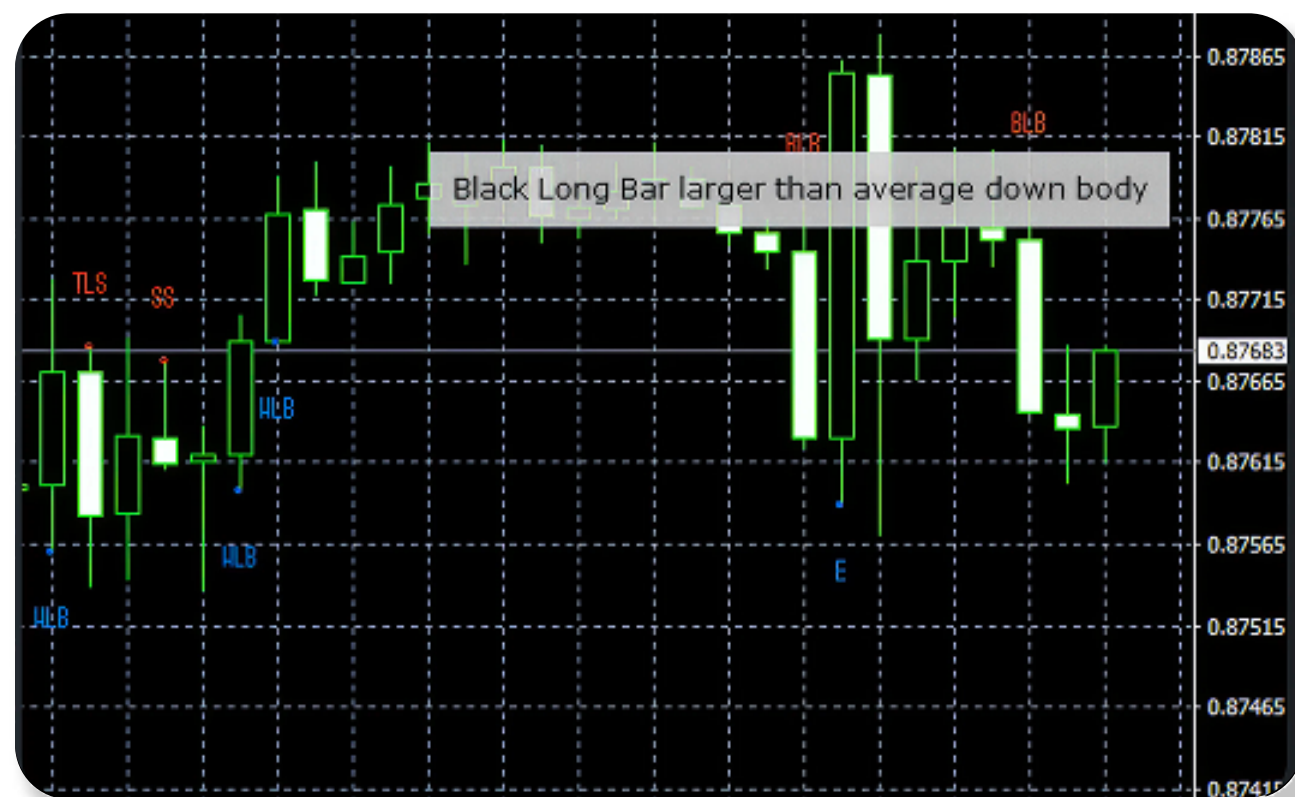

Key levels to craft your trade:

Expert analysis to help you craft your trades with an instant viewpoint on the preferred direction and target levels.

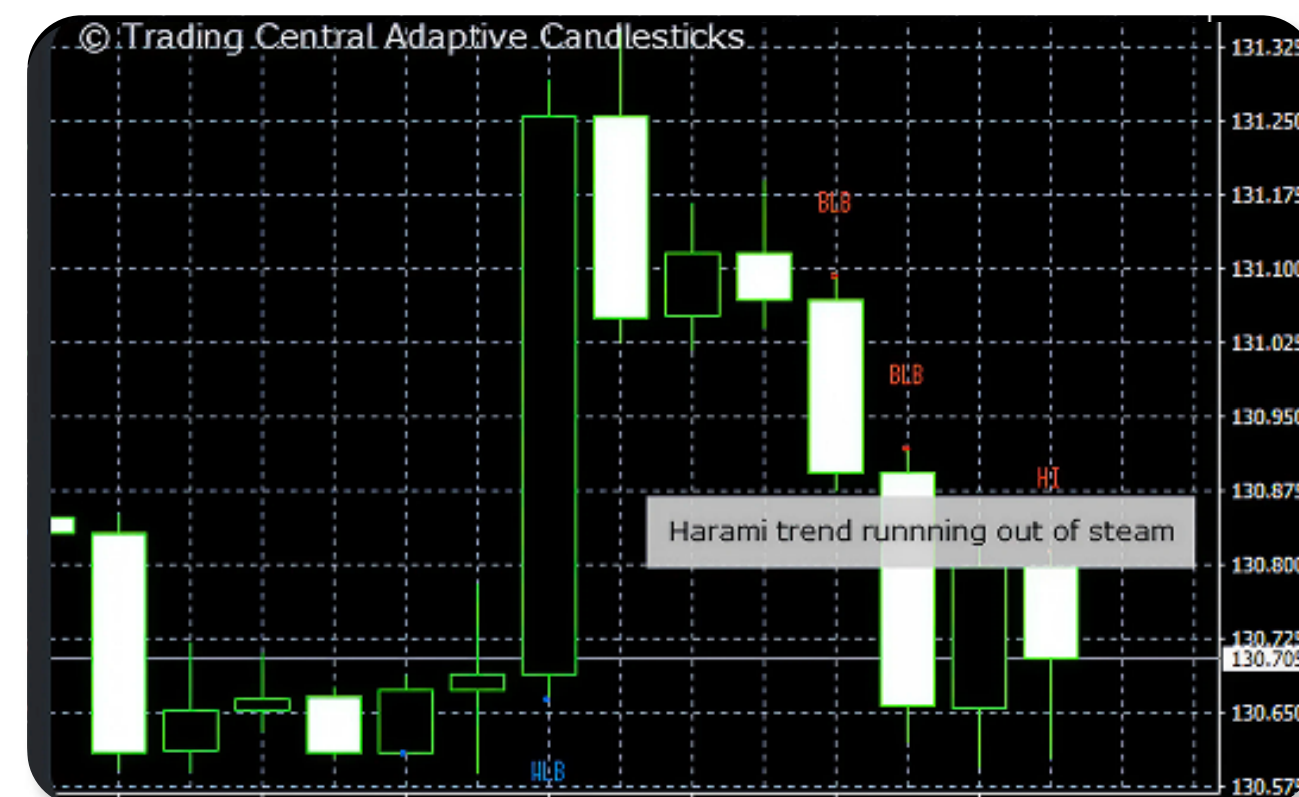

ADAPTIVE CANDLESTICKS

Get instant access to the candlestick patterns that illustrate important changes in supply and demand lines and the struggles between buyers and sellers.

Our favourite patterns:

This indicator scans for sixteen time-trusted candlestick patterns instantly on any chart.

Expert filtering for what's important:

This indicator combines candlesticks with quantitative and technical analysis, focusing on key patterns for informed decisions.

ADAPTIVE DIVERGENCE CONVERGENCE (ADC)

ADC is ideal for short-term trading! It is useful at shorter lengths and offers more timely signals, while also guarding against sideways movements by adapting and lengthening during such periods.

Long & Short entry/exit signals:

Easily spot trading opportunities with clear labels indicating entry and exit signals.

Slow & Fast price indicators:

Use front-weighted moving averages for trend confirmation and other indicators as a basis for ADC components.

Raw & Smooth signal lines:

For fast signals, look for upward sloping lines with ADC raw above ADC smooth as your buying signal. For slow signals, ensure both ADC raw and smooth are above 0 for a stable trend confirmation.

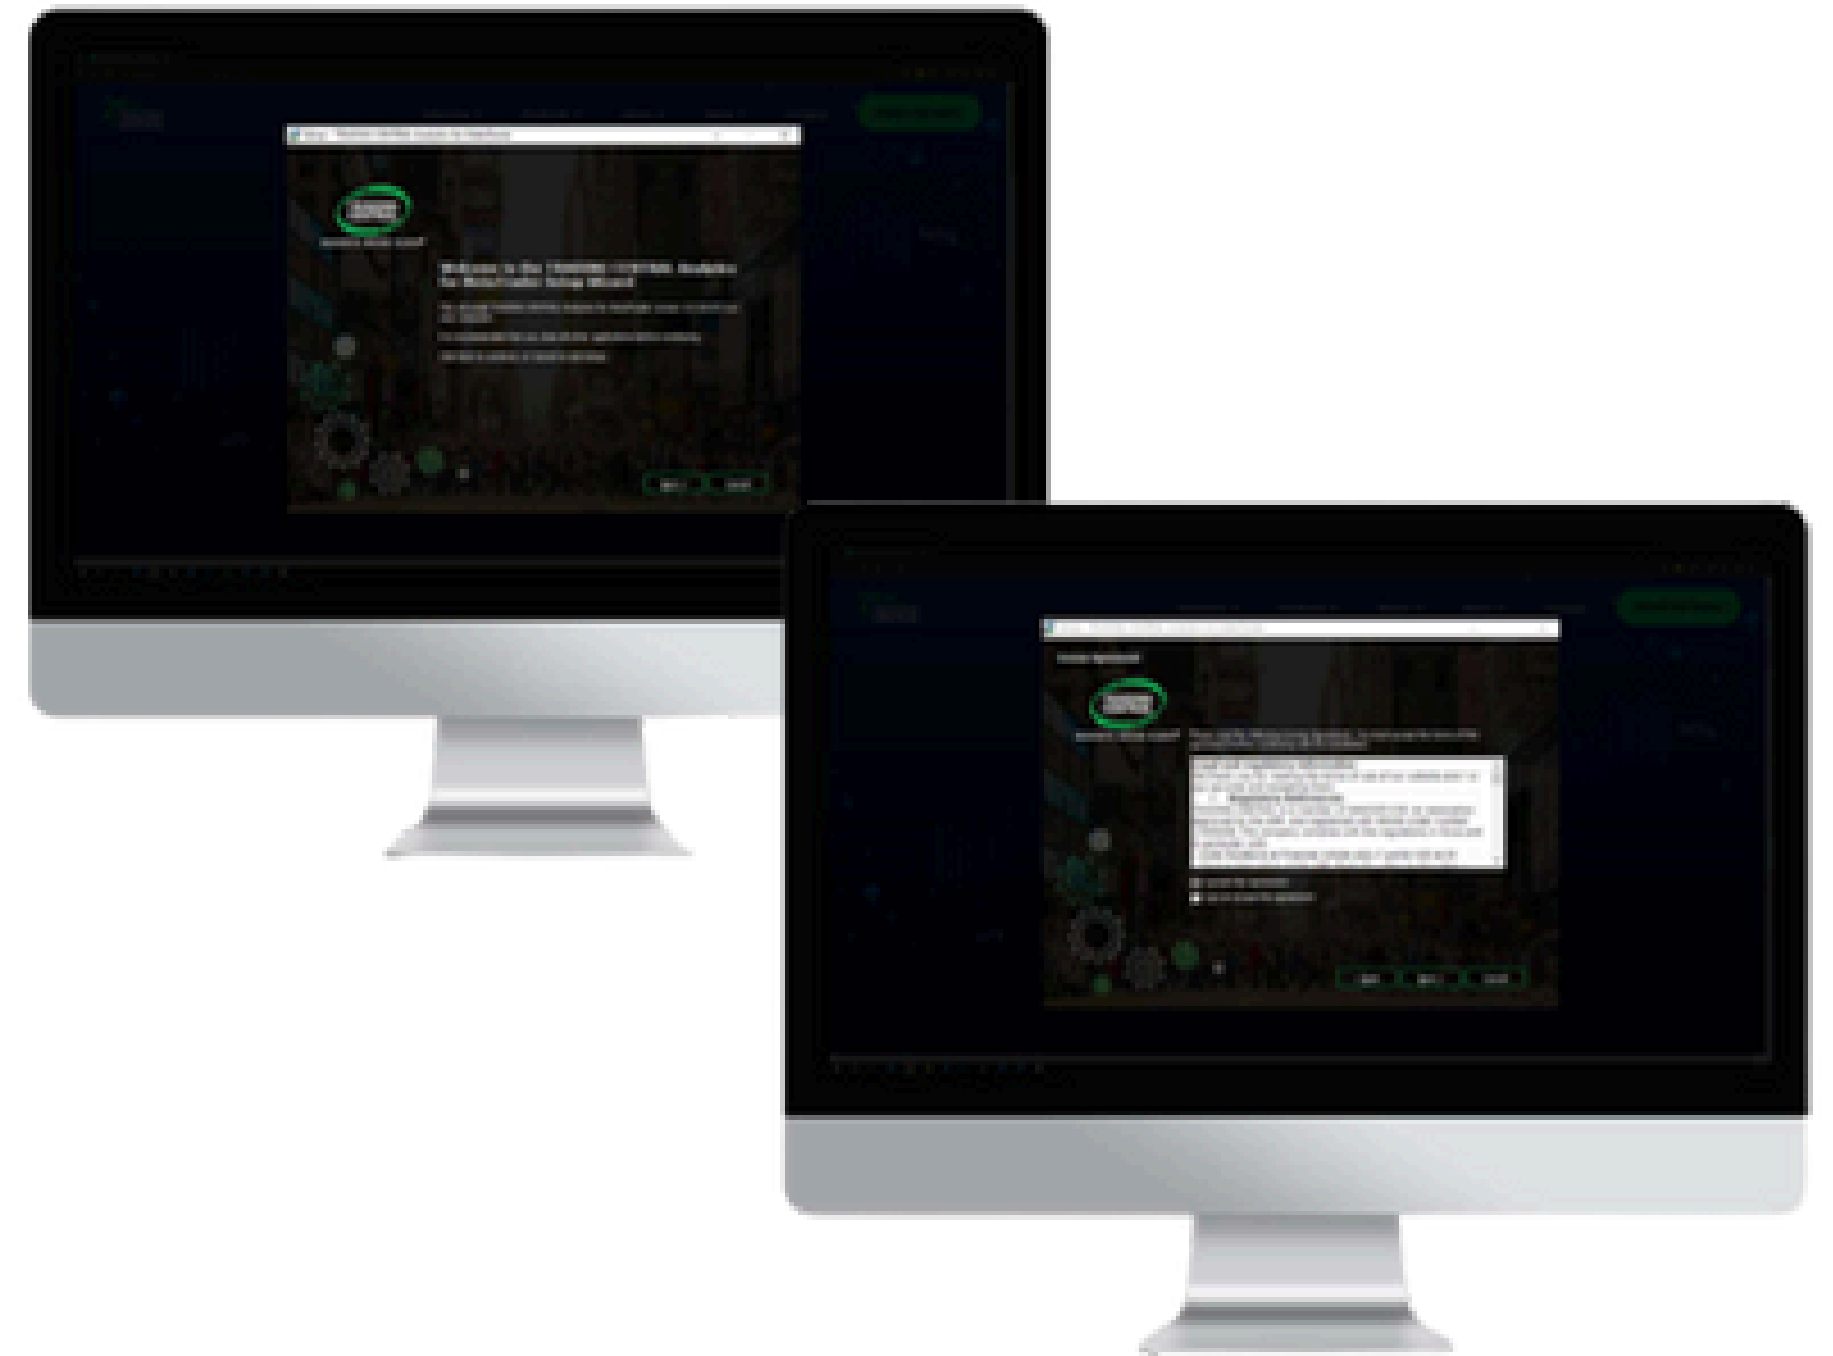

Oscillators Slow & Fast:

Fast signals, fast oscillator sloping up and above zero. Slow signals, fast oscillator above the slow or slow oscillator sloping up, below the fast oscillator, and above the adaptive filter.

How to Get Started?

Download & Install

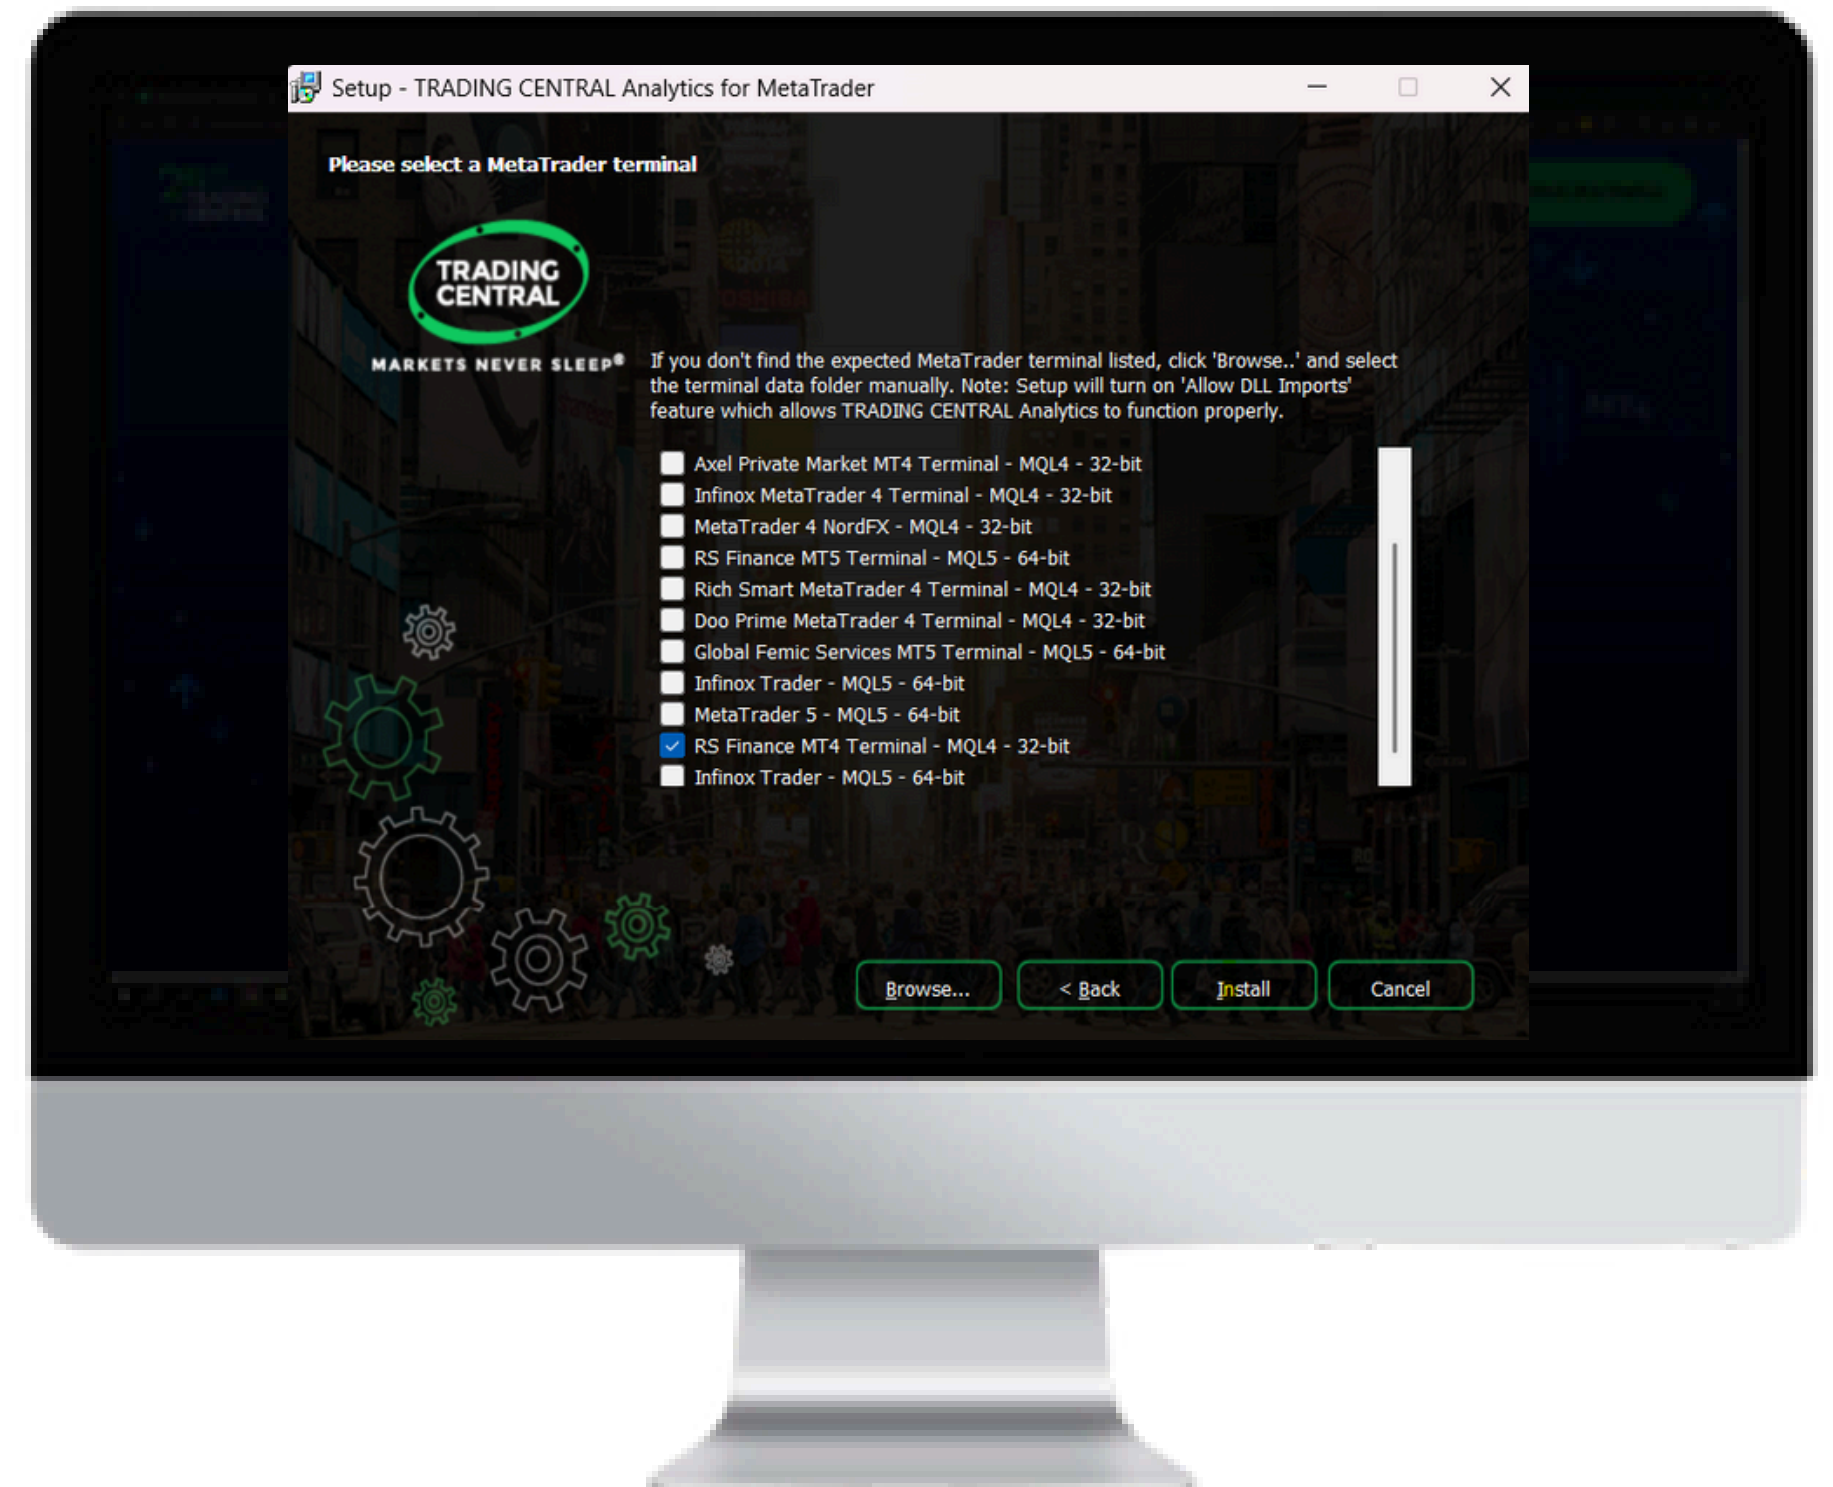

1. **Download** the plugin [here](#).
2. **Double-click** the file to execute it.
3. Select the language to use during the installation.
4. Trading Central Wizard will appear, **Click** next to continue.
5. **To proceed**, you must accept the terms of agreement.

How to Get Started?

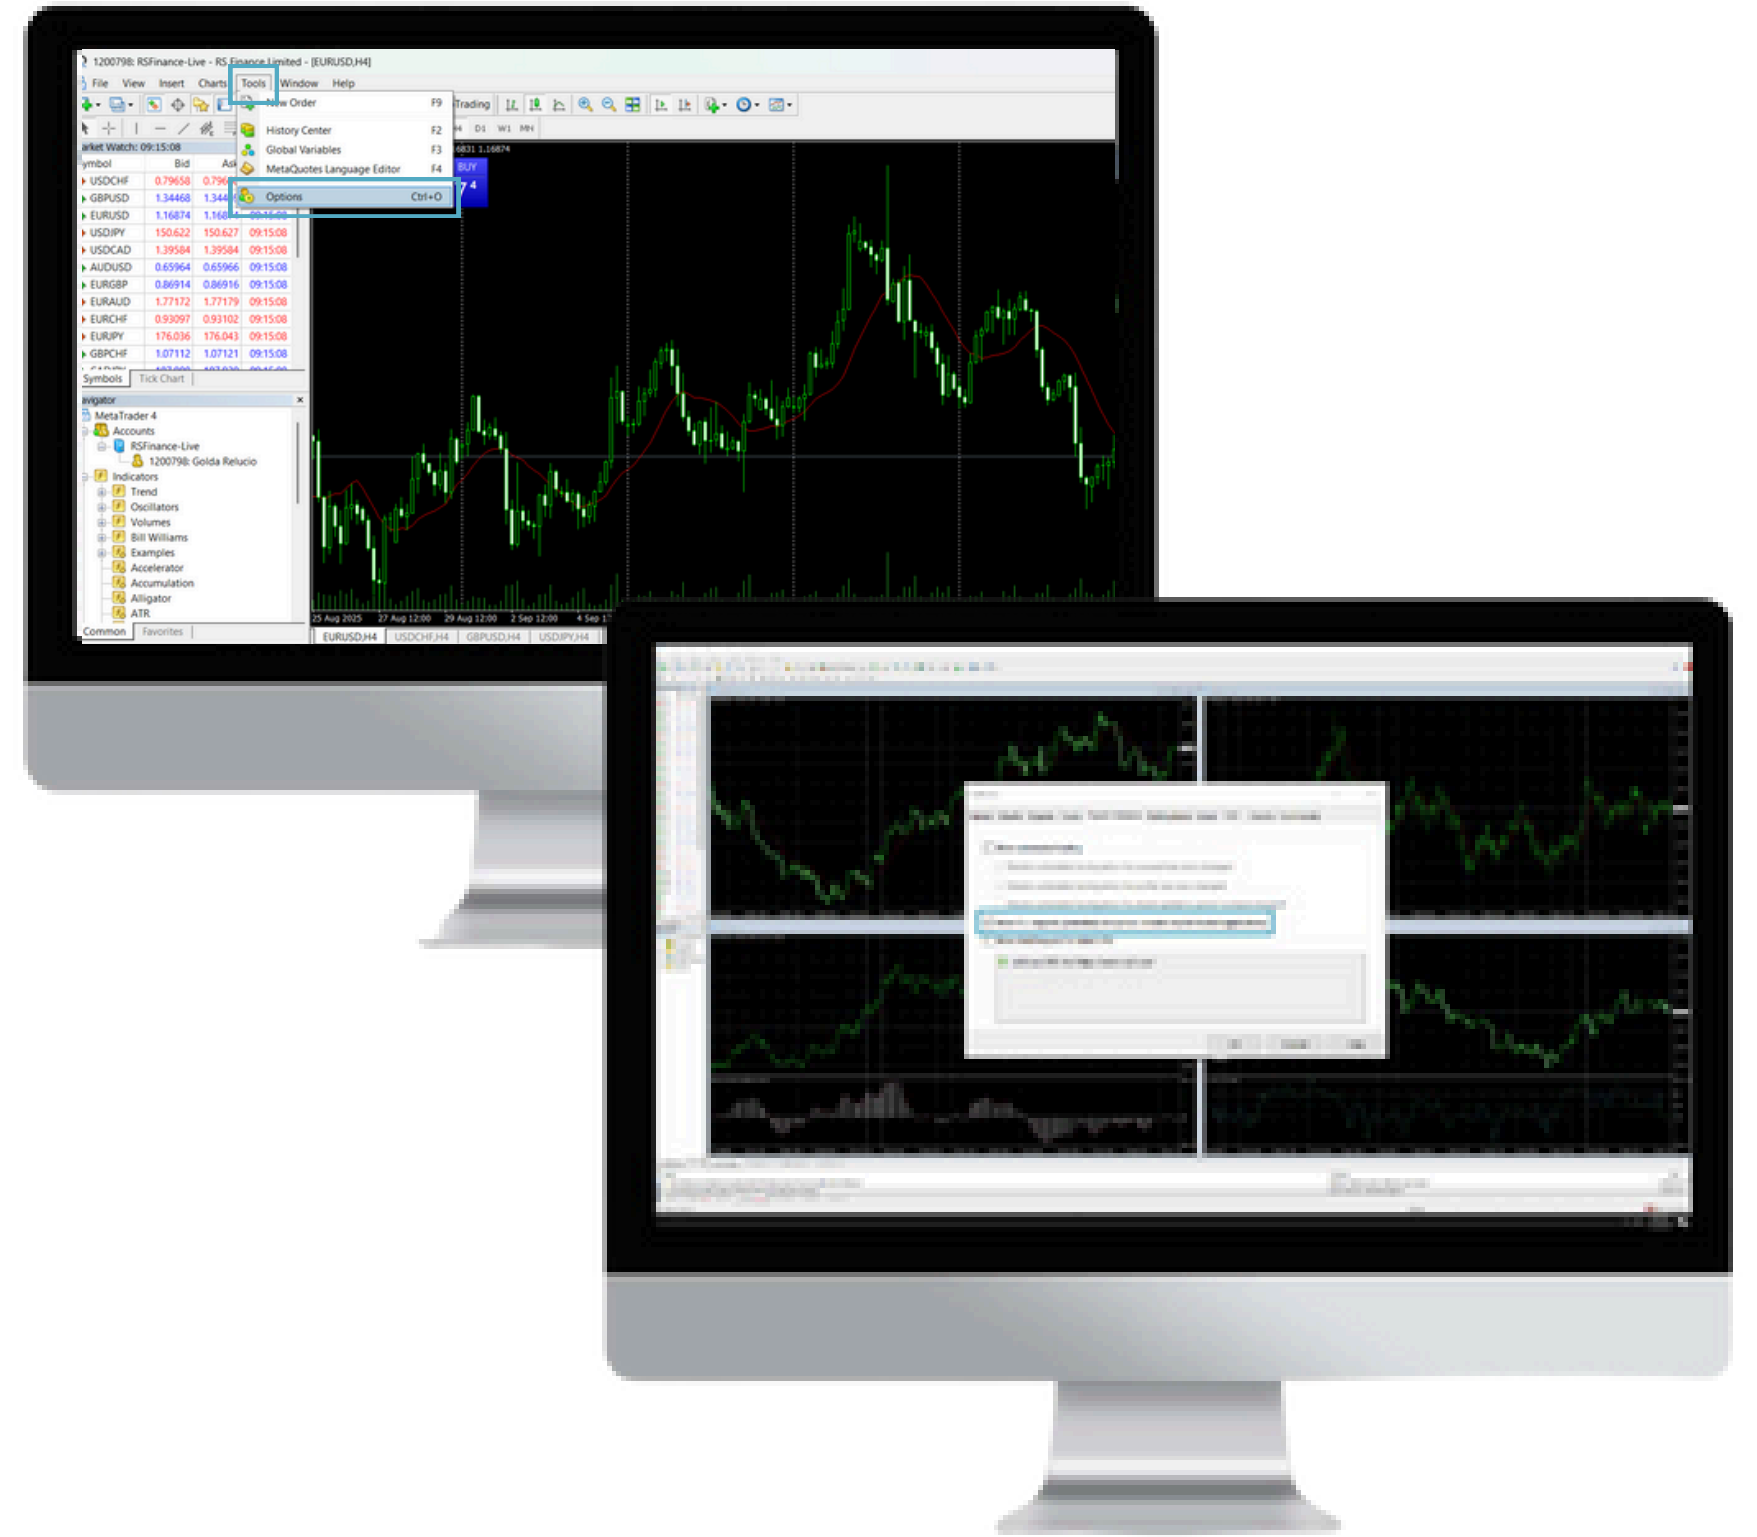

Afterwards, RS Finance' MetaTrader's downloaded terminals will appear as installable options. Choose your preferred terminal and click on "Install" to proceed.

If you cannot locate the RS Finance MetaTrader terminal in the list, click on 'Browse' and manually select the terminal data folder for upload.

Note: To enable DLL imports on your Terminal, follow the steps below.

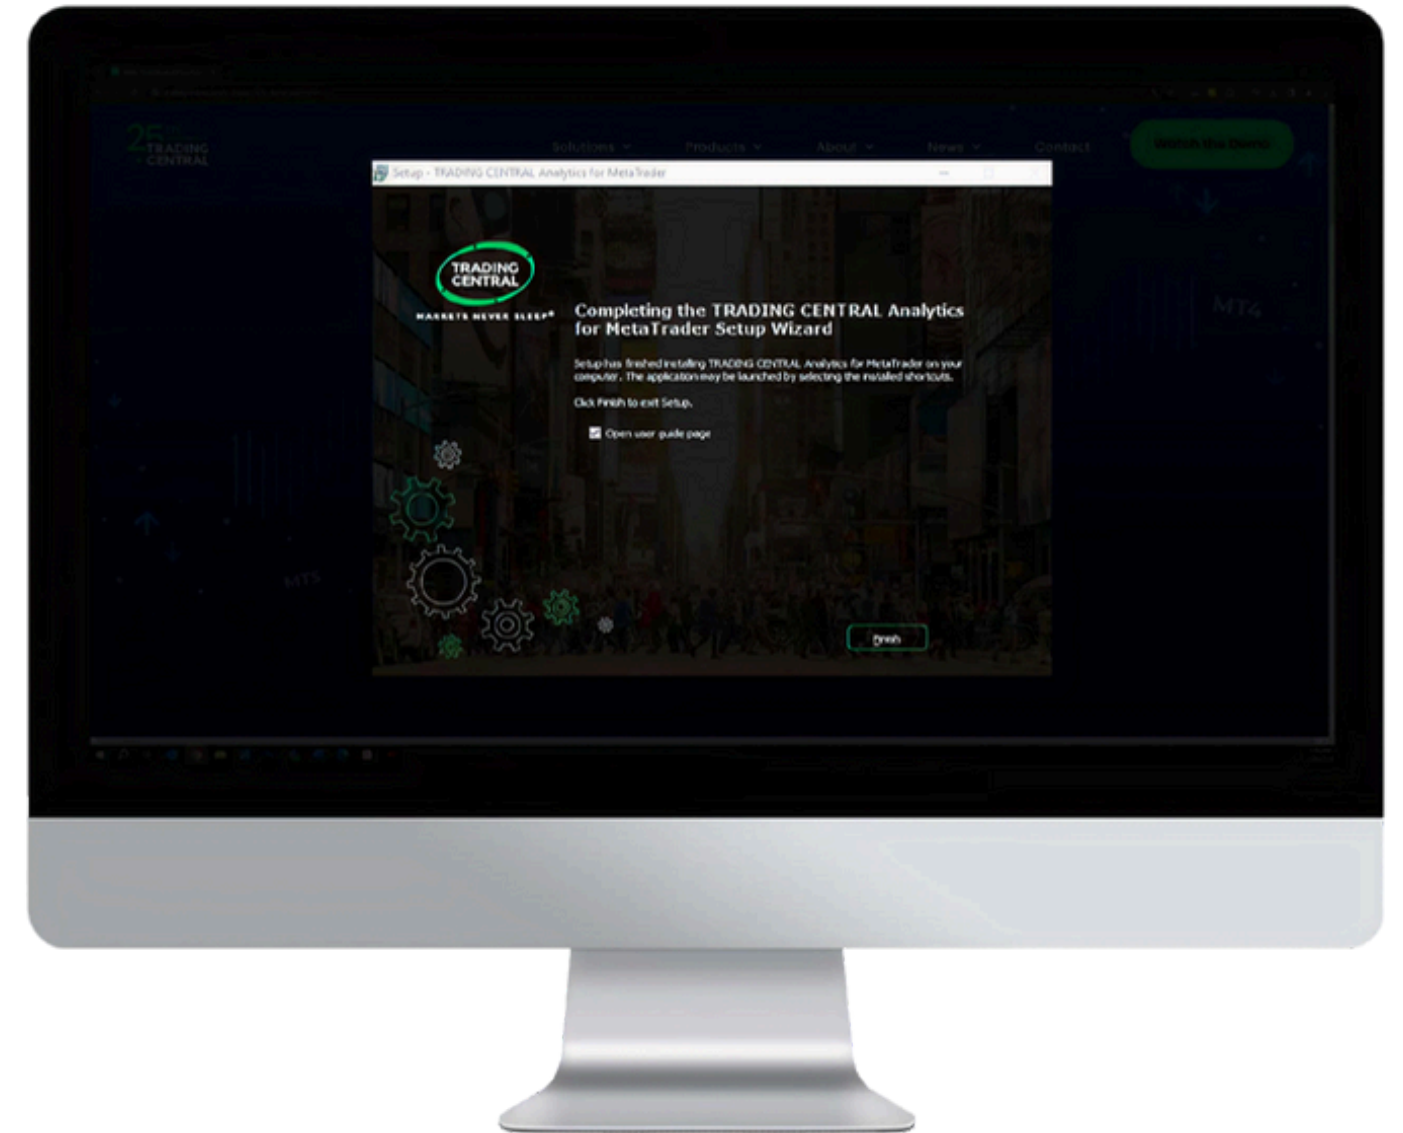

1. **Access** your MetaTrader Terminal.
2. **Navigate** to Tools > Options.
3. **Select** "Expert Advisors" and activate the 'Allow DLL imports' option.

Click Finish to exit setup and User Guide will open

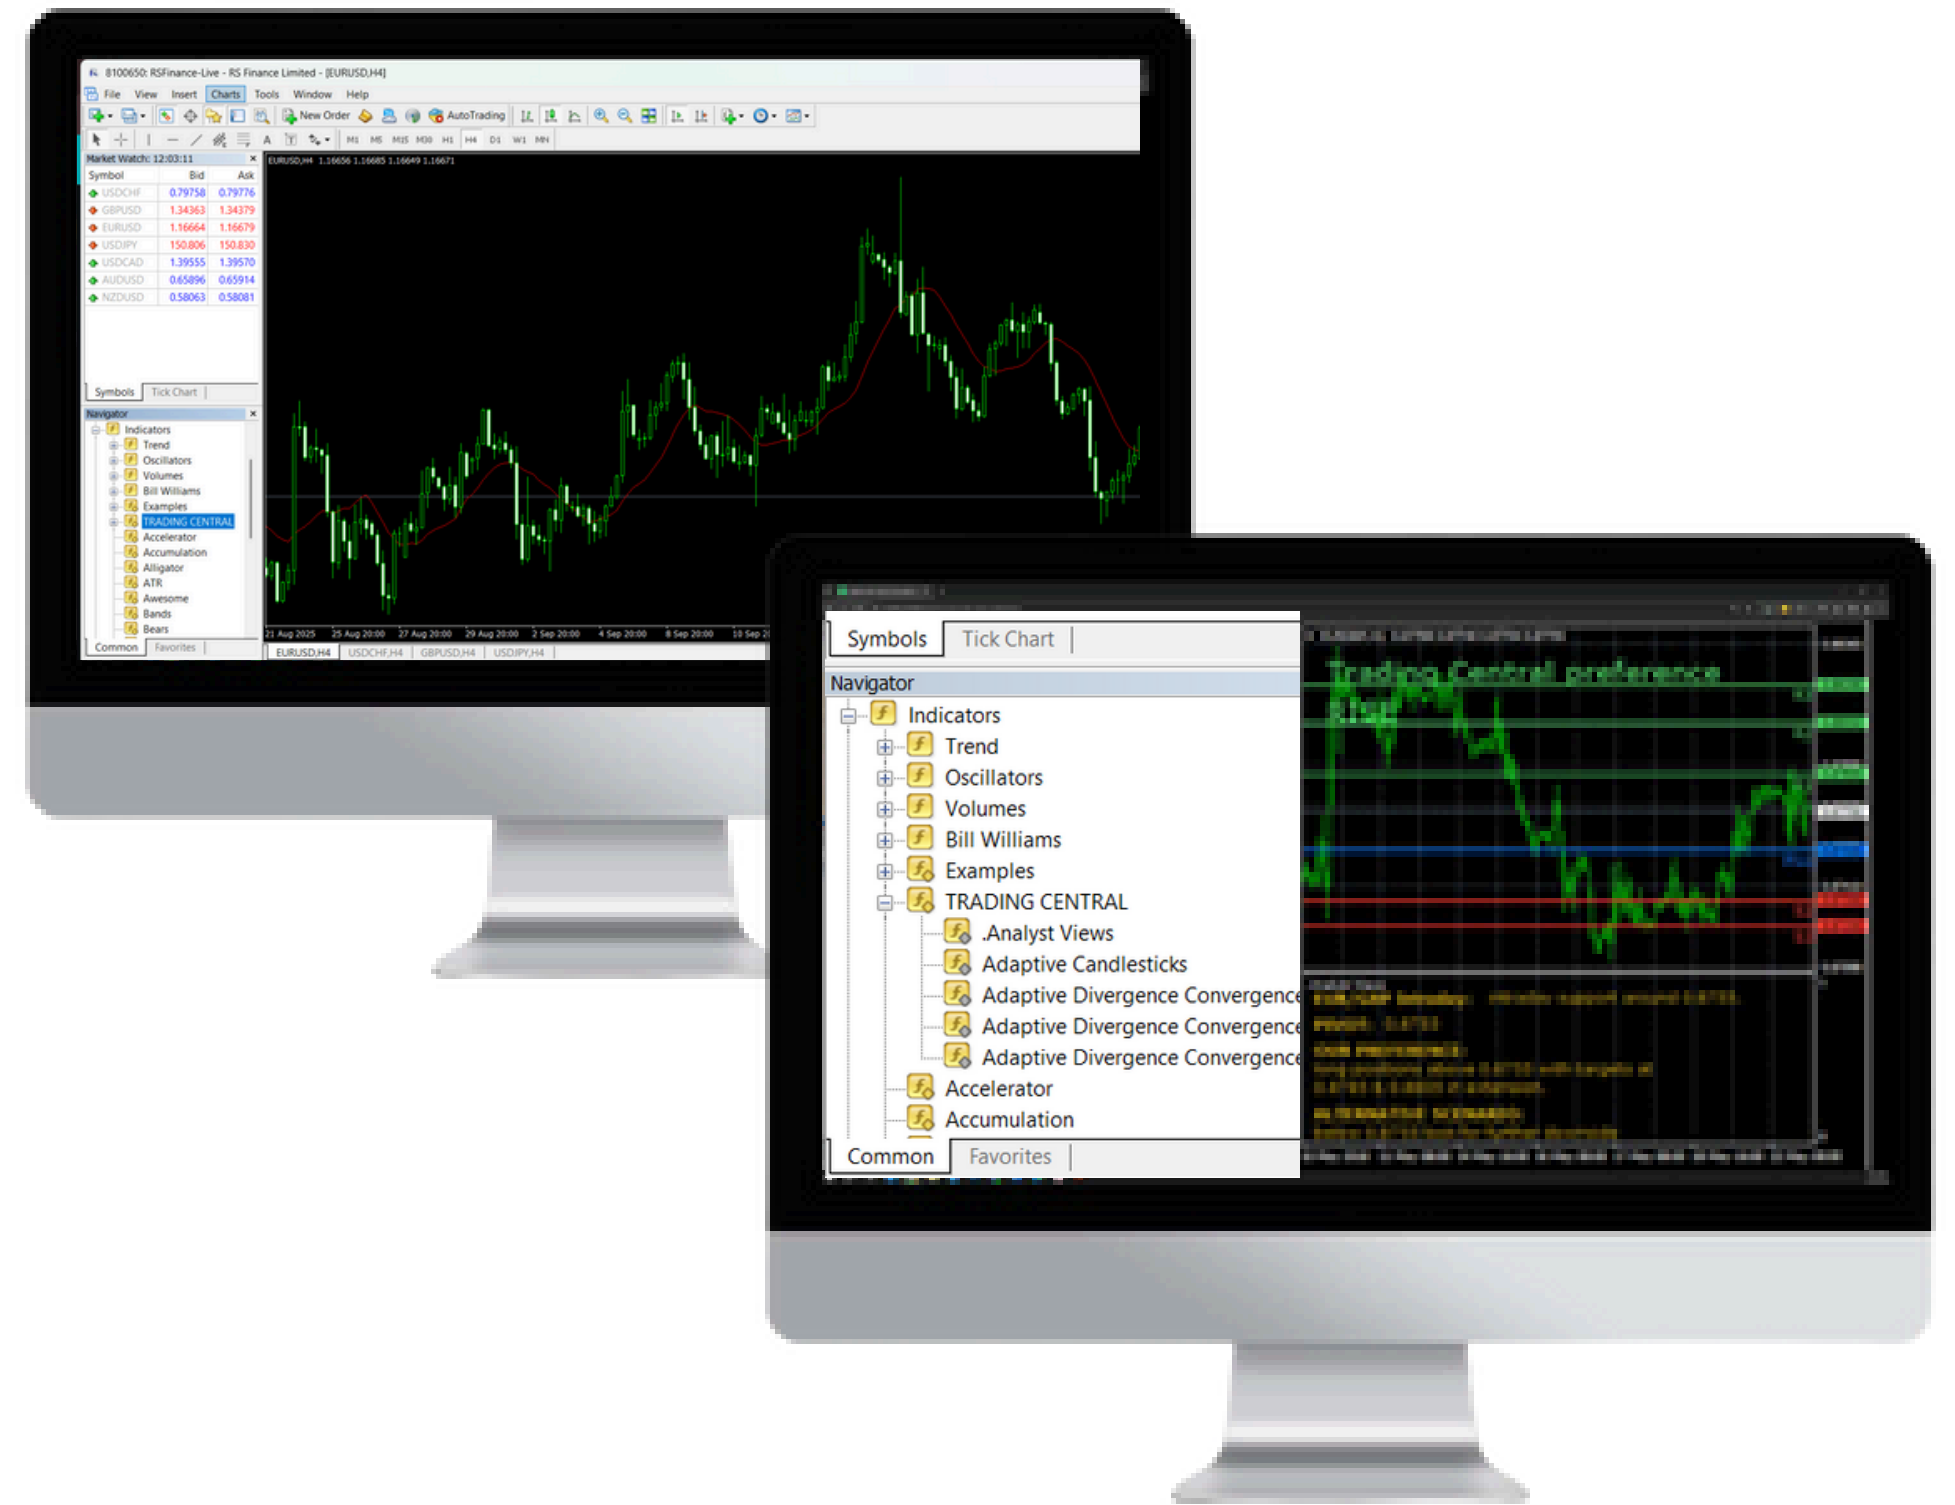

Upgrading from Previous Versions

If you have previous versions installed, you may require Admin rights using the new wizard to uninstall previous versions.

Accessing the Indicators

1. **Locate** Trading Central indicators in your MetaTrader indicator list.
2. **Drag and drop** the desired indicator onto your chart.

Optimize Your Trading Experience with RS FINANCE

At RS Finance, we're committed to empowering our clients with cutting-edge tools like Alpha Generation. Leverage these indicators to find new opportunities, monitor markets, and manage your risk effectively.

Risk Warning: Margin forex, CFDs, and stock trading involve high risk and may not be suitable for all investors. We recommend that you carefully consider your investment objectives, trading experience, and risk tolerance before deciding to trade. CFDs and margin forex trading involve the risk of losses exceeding your initial investment. CFD investors do not own or have any rights to the underlying assets. You may lose part or all of your investment, so you should not invest funds that you cannot afford to lose. We recommend that you seek professional advice from an independent financial advisor before trading on or through our platform.
